3. Device Installation

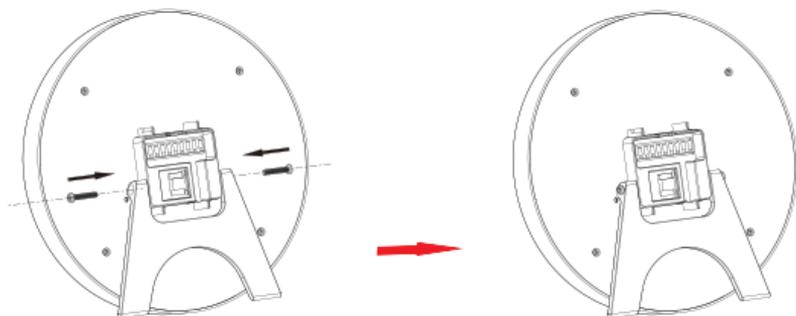

3.1. Installed On The Desktop

Step 1: Turn the camera end of the device upward and turn it to the back.

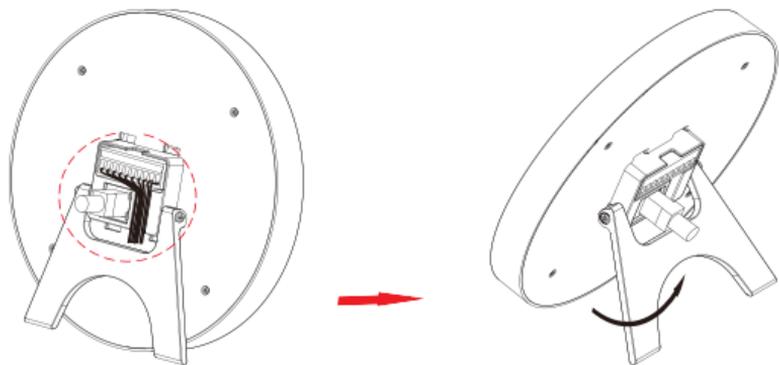

Step 2: Put the silicone ring into the screw hole position on the inside of the desktop bracket.

Step 3: Align the holes of the bracket with the holes of the device, and fasten the bracket to the body with screws.

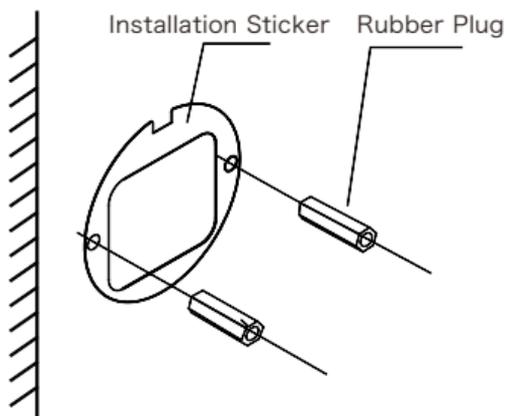

Step 4: Connect wires. To spread the desktop stand and adjust the angle as needed.

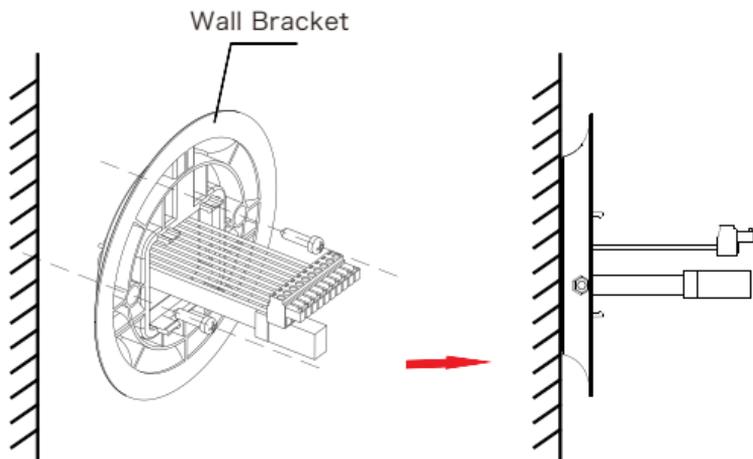

3.2. Wall Mounted

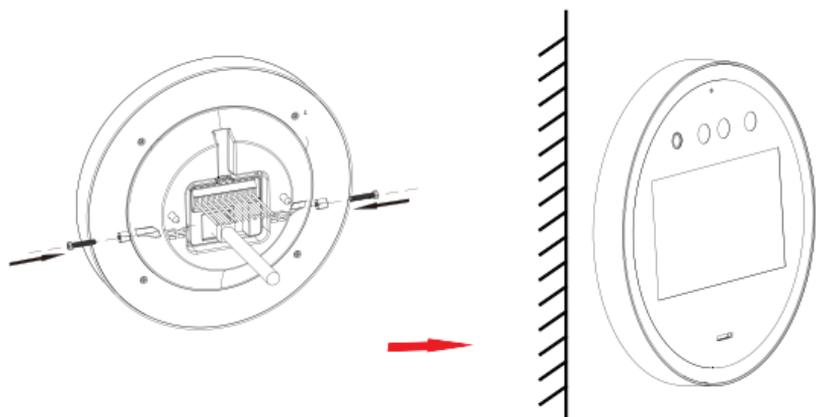

Step 1: According to the installation sticker, open holes on the wall and install the rubber plug.

Step 2: Pass the network cable and 10PIN wire through the wall bracket, and arrange the wire into the wire groove, then fix the bracket to the wall with screws.

Step 3: Connect wires, install the device on the wall bracket, then align the screw holes on the left and right sides, install the nuts and lock the screws.

4. Platform Operation

Boot

According to the introduction of the wire interface, connect the device to the network so that the device and the configuration computer are under the same router, and power on.

4.1. Platform Installation

Step 1: Under the Windows operating system, double-click "SDP2000_EN_x-64_VX.X. X.exe", and follow the prompts to perform the installation.

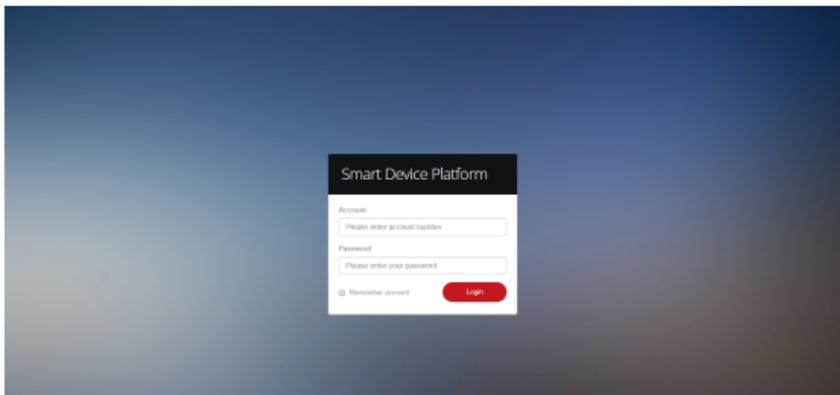

Step 2: After the installation is complete, the desktop displays the SDP2000 Sever platform icon.

4.2. Log In

Step 1: Double-click on the desktop "" to enter the login interface. (Google Chrome or Firefox browser is recommended).

Step 2: Enter the user name "admin", password "admin", and click "Login" to log in to the LAN platform.

4.3. Add Device

Step 1: After logging into the platform, check "Resource - Device - Search Device".

The image displays the main dashboard of the Smart Device Platform. On the left is a dark sidebar with a navigation menu. The "Device" option is highlighted in red. The main content area has a light gray header with search filters for "Device Name", "SN", and "IP Address", and another row for "Device MAC", "State", and "Version". Below the filters are buttons for "Add", "Del", "Search Device" (highlighted with a red box), and "Batch Upgrade Firmware", along with an "Export" button. A table with columns "Device Name", "Device Type", "SN", "IP Address", "Device MAC", "Version", "Communication Port", "Area", "State", and "Setup" is shown, with the message "No matching records found!" centered below it. The top right corner shows a user profile icon and the name "H. Admin".

Step 2: Select the device, click "⚙️" to modify the device IP, and click "Submit".

The screenshot shows the 'Smart Device Platform' interface. A table lists devices with columns for SN, Device Name, Device Type, IP Address, Device MAC, and State. A 'Conf.' dialog box is open over the table, allowing configuration of the selected device's IP settings. The fields are: IP Address (172.18.195.17), Network Mask (255.255.248.0), Gateway (172.18.192.1), and DNS (172.18.192.1). 'Cancel' and 'Submit' buttons are at the bottom of the dialog.

SN	Device Name	Device Type	IP Address	Device MAC	State	State	Setup
	88968	FK02GVW	172.18.195.17		On line	Not Added	
	FRD	HSRW	255.255.248.0		On line	Not Added	
	FRD1111133	HSRW	172.18.192.1		On line	Not Added	
	Y94	FK02GVW	172.18.192.1		On line	Not Added	
	123456	FK02GVW			On line	Not Added	
	710128534962	FK02GVW	7101285349629	7101285349629	On line	Not Added	

The device is turned on "DHCP" by default after leaving factory. If the device is not connected to a DHCP server, but DHCP is set to "On", the default values are as follows:
IP Address: "192.168.1.88" Subnet Mask: 255.255.255.0 Port: "80"
(Some device ports are "7080")

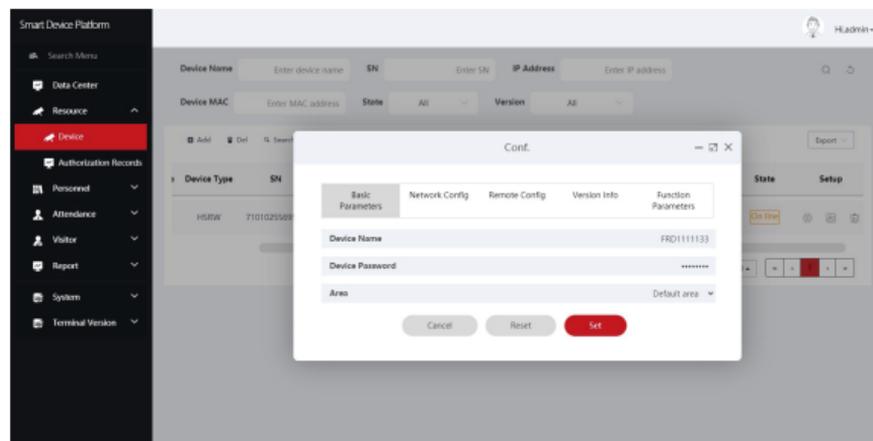

Step 3: Select the device and click "+" or "Add", select the area, and click "Set".

The screenshot shows the 'Smart Device Platform' interface with a table of devices. An 'Add device' dialog box is open, showing the number of selected devices (1) and a dropdown menu for 'Area' set to 'Default area'. 'Cancel' and 'Set' buttons are at the bottom of the dialog.

SN	Device Name	Device Type	SN	IP Address	Device MAC	Communication Port	State	State	Setup
	88968	FK02GVW	123456				On line	Not Added	
	FRD	HSRW	3214				On line	Not Added	
	FRD1111133	HSRW	7101				On line	Not Added	
	Y94	FK02GVW	7101				On line	Not Added	
	123456	FK02GVW	7101284872499	172.18.192.112	2C:6F:51:05:50:43	7080	On line	Not Added	
	710128534962	FK02GVW	7101285349629	172.18.192.113	2C:6F:51:05:50:43	7080	On line	Not Added	

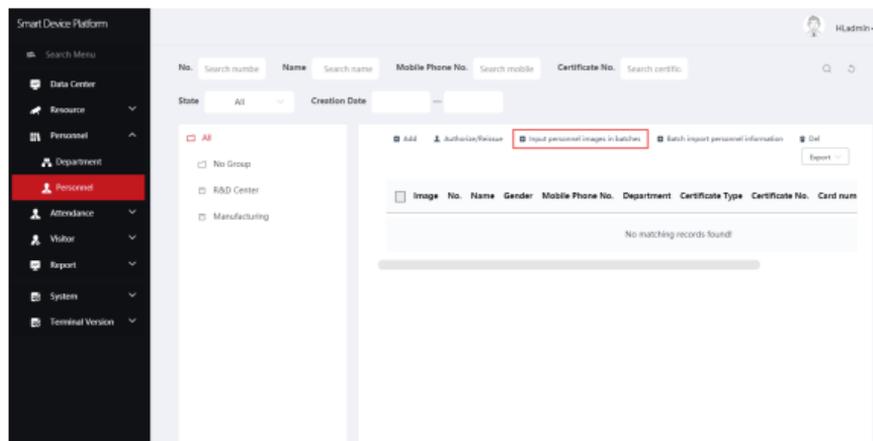

4.4. Device Configuration

After logging in to the platform, enter the "Device" interface and click "⚙️" to configure the basic parameter and other parameter of network, remote, function and delete the device.

4.5. Import Face Library

Step 1: [Input personnel images in batches] After logging into the platform, click "Personnel - Personnel - Import personnel images in batches" - select pictures - "Upload" and the pictures are added into the device.

[Input personnel information in batches] When importing pictures in batches, the pictures must meet the following requirements:

CAUTION

1. The picture naming format can be set as: name.jpg, name_department name.jpg, name_department name_personnel number.jpg (the department name must exist in the system; the personnel number must be unique).
2. Ensure a clear face picture and the total size must less than 80M.

Step 2: Click "Input personnel in batches - batch add people templates.xls", download "Templates", enter personnel information in the template according the picture, then save the template, click "Import", and import the saved personnel information template.

The screenshot displays the 'Smart Device Platform' interface. On the left is a navigation menu with 'Personnel' highlighted. The main area shows a table with columns for 'No.', 'Name', 'Mobile Phone No.', and 'Certificate No.'. A modal dialog titled 'Staff information import' is open, showing a download link for 'batch add people templates.xls' and a list of instructions for importing personnel information. The 'Import' button is visible at the bottom of the dialog.

This operation can improve or cover the information of the existing personnel number of the system

Note:

1. Please fill in strictly according to the template
2. The uploaded file must be excel file(.xls/xlsx)
3. Do not upload the same file repeatedly
4. The uploaded file shall not exceed 2M

Import

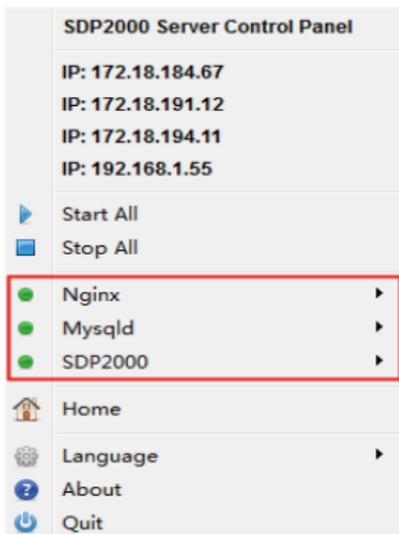

Step 3: After the gallery is added into device it can realize face recognition.

CAUTION

When abnormality occurs on the smart terminal platform, such as abnormal reading or abnormal data interface request, please follow the steps below:

Right-click the running SDP2000 icon in the lower right corner of the desktop to check whether the status of Nginx, Mysqld, and SDP2000 is green (normal state). If any item is displayed in gray, restart the software to make it green.

4.6. Online Upgrade

Prerequisites: The device is connected to the Internet.

● Auto online upgrade

Step 1: Open the IE browser, enter "http: // device IP address: port number", such as "http://192.168.1.88", enter the login interface, enter the device default user name (admin) and password (12345).

Step 2: Click "Maintain", check "Auto Online upgrade", every Wednesday (this time can be set to other day) the equipment automatically detects whether there is a new version online, when "New version detected, update or not" is displayed, click "Upgrade" , The device interface displays "Upgrade will start after reboot. Please do not shutdown the power", then the upgrade progress bar will be displayed, and the latest version of the program will be used after the upgrade is completed.

● Manual online upgrade

Step 1: Open the IE browser, enter "http: // device IP address: port number", such as "http://192.168.1.88", enter the login interface, enter the device default user name (admin) and password (12345).

Step 2: Download the upgrade file and click "Maintain → Online Test". When there is a new version, the system will prompt a sign stating whether to download it? Click "OK" to automatically download the new version to the default path.

Step 3: The system prompts : Are you sure to upgrade the new version? Click "Upgrade", the device interface will display "Upgrade will start after reboot. Please do not shutdown the power", then the upgrade progress bar will be displayed, and the latest version of the program will be used after the upgrade is completed.
